## Introduction

The rationale behind publishing this book is to provide respectable readers with a comprehensive knowledge of vocabulary. To do so, it seemed that test context can be conceived as the most reliable, practical and useful context.

To facilitate learning, this book is divided into three parts, namely, Easy, Medium, and Difficult tests. This way gradually, steadily, surely, and firmly in a linear fashion your vocabulary knowledge expands. Vocabulary list audio files are offered alphabetically so that you not only learn the vocabulary but also the correct pronunciation of the words. It is believed that auditory learners learn vocabulary much better if they listen to the words to be learned.

This book is suitable for all those students who want to improve their knowledge of academic vocabulary and get ready for some local, international, or proficiency tests. It is highly recommended that tests be done gradually, step by step, level by level to make vocabulary learning easy, enjoyable and effortless. As a round up after covering all tests, it is a good idea to listen to the audio-files provided several times.

Finally, it should be mentioned that though the newly learned vocabulary might be subject to oblivion, you can make your knowledge enduring and everlasting just by reviewing your audio-files routinely and periodically.

Wishing you all the best  
Dr. M.S. Bagheri
